

A Message from Dr. Rasha Kelej, CEO of Merck Foundation on World Earth Day 2020

Today we celebrate the **Earth Day** with a great gift: We have got

Less industrial pollution
Less air pollution from cars
Less Co2 footprint from plants
Less noise pollution at airports
Lot less litter on streets

All It took was a global pandemic shutdown. Now our Mother Earth can breathe. I know we are missing our normal lives, but it is time to imagine what we are going to do once things go back to normal. Our normal must be different. Let's work together everyone in our own way to protect our planet and save the earth.

Let's love our earth.
Love is the greatest gift.

Happy
Earth
Day 22.4.2020

**“Today we celebrate the Earth Day
With a great gift: We have got
Less industrial pollution
Less airplution from cars.
Less Co2 footprint from plans.
Less noise pollution at airports.
Lot less litter on streets.
All It took was a global pandemic shutdown.**

**Now our Mother Earth can breath.
I know we are missing our normal lives but it is
time to imagine what we are going to do once
things go back to normal.
Our normal must be different.
Let's work together everyone in his own way to
protect our planet and save the earth.
Let's love our earth.
Love is the greatest gift.“**
